

525 Flinders St

CATEGORY: MEDIA WALL

SKS Technologies was awarded the Audiovisual project for the complete renovation of the lobby at 525 Flinders St, Melbourne.

The equipment used in this innovative design is a 2.6mm pitch LED video wall using Smartsign software to manage the content.

The Smartsign software also turns the screen off and on. There is an audio system throughout the reception to distribute radio on audio from the live TV feed on the videowall.

The total project is made up of 29 customer LED cabinets to create the look of a single screen.

1 Foyer - Videowall and directory

2 Close up of LED wall integrated with live moss wall
