

New Hope Group

CATEGORY: ENERGY

SKS Technologies were engaged to deliver the audio visual systems for New Hope Group in their new tenancy at 175 Eagle Street, Brisbane.

The project involved a substantial fitout of premium office space and consisted of video conferencing meeting rooms, boardrooms, flexible collaboration spaces, breakout areas, digital signage and room booking facilities.

The technology solution is focused on a Microsoft Teams environment to enable a familiar and consistent experience for all users. Due to the tight integration with IT systems and infrastructure, SKS Technologies worked closely with the client's IT department to ensure the successful deployment of inter-dependent systems.

The user experience was carefully considered to make it easy for staff to work, share and collaborate. Technologies included Condeco room booking systems, Crestron Flex, Crestron control systems, Shure microphones and DSPs, and Samsung displays throughout.
