

Porter Davis

SKS Technologies was engaged by the Porter Davis Group to provide the design and implementation of the Audio Visual requirements for their new offices in the Docklands region in Melbourne's CBD. Through a consultative approach, the team at SKS were able to work in conjunction with the vested parties from Porter Davis to engineer multiple solutions for spaces ranging from small huddle spaces through to joinable meeting spaces, ensuring that each area would provide maximum functionality and value for money.

The basis of design was an economical solution with outstanding reliability and ease-of-use, to which, was delivered on time and on budget. Some of the technologies rolled out were a simple to use keypad that had a unified design ensuring any person utilising any space would have a familiarity with the control and avoid any unnecessary confusion when using the provided AV products. The provision of simply connectivity to wireless presentation devices also ensured that there would be no need for presenters to carry bulky interconnecting cables.

DETAILS

» Job Value \$450,000

As part of the Porter Davis experience, there were a number of small FOH meeting rooms designed for customer interaction and sales development, these rooms were fitted with a fully integrated Room Booking system that streamlined the process of building planning and sales with the end client.

Other spaces included a staff hub where social interaction would take place and full company announcements made and a training facility allowing staff to stay up to date with latest practices and policies.

The entire project has received outstanding reviews by all staff at Porter Davis as they appreciate the simplicity of the system provided allowing them more time to achieve their daily goals without unnecessary disruption due to technical issues

1 Wireless presentation devices

2 Meeting rooms with customer interaction

3 Room booking systems

4 Reliability and ease of use
