

Rialto

SKS Technologies were awarded the contract to supply and install a large scale LED Video Wall to the refurbished Rialto building main foyer.

The wall has numerous functions including the ability to stream stock market reports, display public transport updates whilst showing the Olympics or integrating multiple screen shots.

A feature of this particular solution is the integration into the Building Evacuation System, where the video wall can automatically display evacuation instructions and other critical messages.

DETAILS

- » **Job Value** \$450,000
