

VIC State Library

CATEGORY: LOCAL GOVERNMENT

SKS Technologies was very excited to be part of the redevelopment for the Victorian State Library.

The \$88 million Vision 2020 redevelopment project transforms the State Library Victoria, Australia's oldest and busiest public library and one of Victoria's most important cultural institutions.

At the heart of Vision 2020 is the refurbishment of the Library's incomparable heritage spaces, the creation of innovative new spaces for children and teenagers, and the reinvention of services as we embrace new technologies and promote digital literacy and creativity for all Victorians.

The design was led by an international, award-winning team combining the talents of Australasian design firm Architectus with Scandinavia's Schmidt Hammer Lassen Architects.
