

Westin

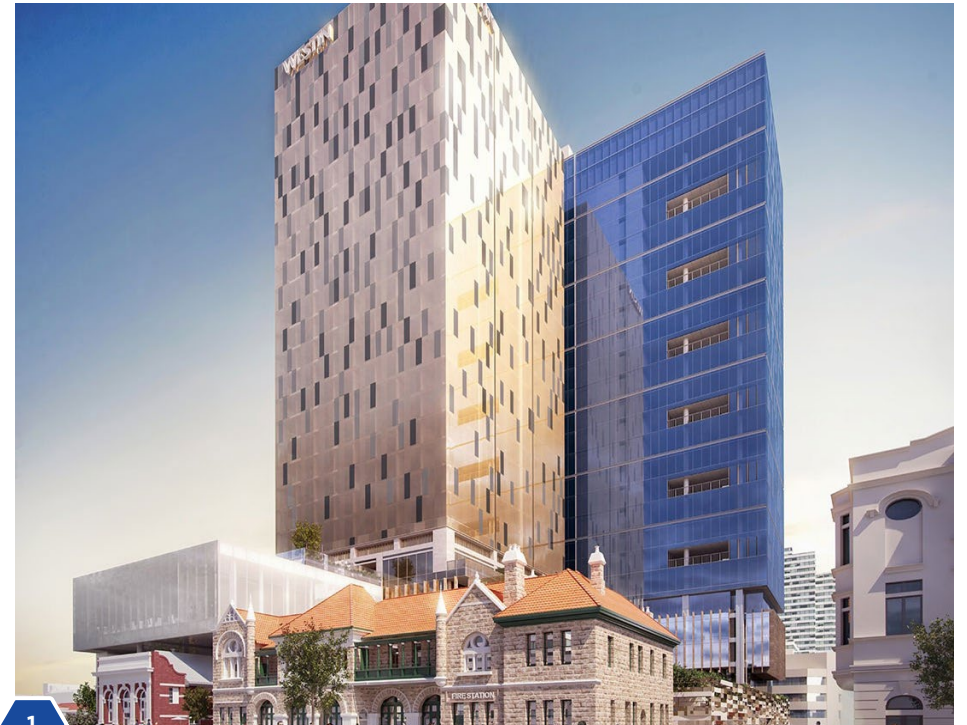

CATEGORY: HOTELS

The SKS Technologies team was engaged to deliver the Audio Visual, Back Ground Music and IPTV systems on the brand new, 26 storey, Westin Hotel Project in Perth Western Australia.

State of the art Audio Visual equipment including Crestron Control, Atterotech and QSC Networked Audio, Kramer IP Streaming, and Screen Technics Projection Screens and Lifts were installed throughout the function and meeting spaces, including 3 combinable multifunction Ballrooms, located on the Podium levels of the Hotel, lower ground through to level 4.

The Back Ground Music system piped throughout the hotel is managed via the QSC Networked Audio and Crestron Control systems. Interfacing with the system is via conveniently located Crestron Touch Panels or Apple iPads for wireless operation.

The IPTV System commissioned by SKS Technologies services all 368 Guest Rooms providing the full suite of Free to Air TV, 20 Foxtel Channels, DAB+ Digital Radio and a large selection of Movies on Demand.
