

# Zendesk

SKS Technologies won the contract for the supply, integration and commissioning of the audio visual equipment for the Zendesk fit out at 395 Collins Street, Melbourne.

Three floors comprising a large number of small meeting spaces, reception area and three large conference rooms with VOIP and Video Conference capabilities. One floor containing a multi-function space, welcome area and bar all linked through a fully customisable control system and 16 x 16 audio visual matrix. The space also has video conference facilities with recording and streaming capabilities with distributed audio coverage and wired/ wireless microphone systems.

Great consideration was required for the integration of the proposed solutions due to the heritage listing of the building, through extensive consultation and outstanding project management, the end result not only met but exceeded the client's expectations and delivered a world class office environment.
