Cisco Webex Board 55S

Cisco Webex Board 70S

Cisco Webex Board 85S

## The Cisco Webex Board: An all-in-one team collaboration device for the huddle space to the boardroom

The Cisco Webex® Board is a team collaboration device that combines wireless presentation, digital whiteboarding, and video conferencing in a single device. The Webex Board is ideal for creative environments where co-creation with local and remote participants is the primary focus. It is a touch-based system that securely connects teams and their content in physical rooms with virtual teams and meeting spaces. The Webex Board helps teams collaborate in meeting rooms and securely connects to virtual meeting spaces to facilitate continuous workflow before, during, and after everyone has left the conference room. Through the Cisco Webex Teams™ app, team members who are both in the physical conference room and who are attending remotely can meet, message, call, and whiteboard from their device of choice.

## Cisco Webex Board benefits

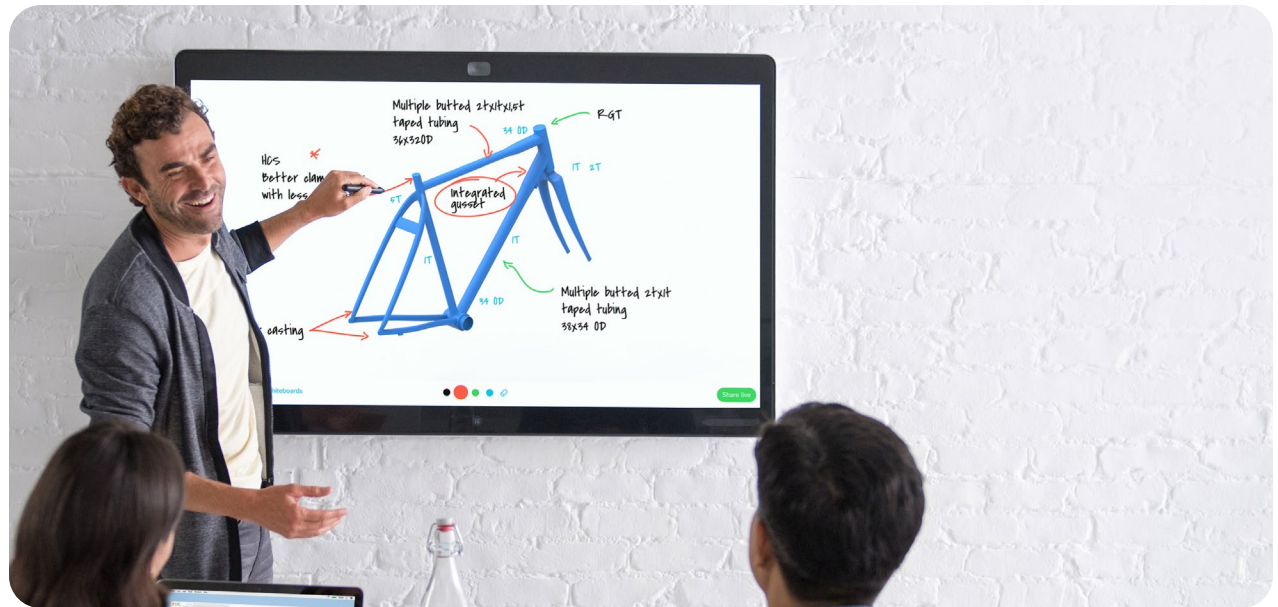

- **All-in-one solution:** Available in 55-, 70- and 85-inch versions, the Webex Board is the only tool you need to collaborate from huddle spaces to boardrooms.
- **Simplicity:** Our fully touch-based system is intelligent, intuitive, and effortless to use and supports simplified one-button-to-push meeting-join experience for fast meeting start and consistency with rest of Cisco® Webex Rooms devices.
- **Continuous teamwork:** The cloud-based platform lets your work continue before, during, and after the meeting on Webex Teams.
- **Cost-effective, scalable, and secure:** Cloud registration makes it affordable and easy to deploy in all of your conference rooms, with end-to-end encryption.

## Collaborate and co-create anytime, anywhere

The Cisco Webex Board, together with the Cisco Webex service and Webex Teams app, offers an integrated and comprehensive lifecycle approach to teamwork that is as yet unimagined, and thus unmatched, by any other solution on the market. The Webex Board itself performs the key activities that teams need to work together in a meeting room. The Webex service connects the Webex Board to a virtual space so work can continue even after the meeting has ended.

Key capabilities of the Cisco Webex Board include:

- **Wireless presentation:** Share your presentation locally in the room or remotely, without any need for wires, dongles, adapters, or typing in PIN codes.
- **Digital whiteboard:** Easily whiteboard with the Cisco Webex Pen or your finger and automatically save content to a Webex Teams virtual space; multiple people can whiteboard—in the room or remotely on any Webex Teams app. You can even annotate on any content that you've shared to the Webex Board.

- **Audio/video conferencing system:** Make your high-definition video or high-fidelity audio calls directly on the Webex Board.
- **Cognitive collaboration:** Enjoy a frictionless meeting experience with intelligent features like Webex Assistant, facial recognition, automatic noise suppression, and people count.
- **Continuous workflow:** Connect the Webex Board to a virtual Webex Teams space and your whiteboard creations and other shared documents will live there persistently and securely, to be reviewed and edited by any member of the team from another Webex Board, Webex Desk Pro, or the Webex Teams app.
- **Web apps:** Launch web apps directly from the home screen with the push of a button. Add your most commonly used applications like O365, Trello, or Kanban software with the option to share and annotate on the content during meetings.
- **Digital signage:** Provide company announcements or alerts, or extend greetings to visitors with digital signage that is displayed when the Webex Board isn't in use.
- **Control Hub:** Maintain and administer all your devices remotely from Control Hub, allowing you to enable updates and preferences from one location to all your devices.
